

Introducing the new 'BOXER' model commercial machine from Rocket Espresso Milan.

The Rocket Boxer model could be considered a compact machine. A clever design has created the Boxer to offer all the features of a full size model in a small footprint, providing a superior choice of machine with versatility.

A well balanced machine that will produce both great espresso and punch out reliable steam for milk based coffees thanks to a generous 13.2 litre boiler.

The internal layout is well configured

offering temperature stability to keep up with demand. Industry acknowledged quality branded components have been used to support the appointed features that will deliver a premium flavour in the cup.

Complete with clean ergonomic lines and an open design the Rocket Boxer will be a consistent platform for service and practicality in the espresso bar.

The BOXER 1 and 2 Group machines offer the following key features in return for a value for money fair price:

- Super tough steam valves with smooth easy open/close movement.
- Wear resistant and illuminated individual touch pad keys.
- Big 13.2 litre (2 group) boiler for loads of dry steam and hot water.
- Microprocessor controlled electronics.
- Manual override button to operate group solenoid and pump in case of electronic component failure.
- Heavy duty cast alloy side panels which offer a quality finish and look on the bench.
- Cool touch steam wands.
- Automatic back flush cycle.
- Temperature adjustable hot water valve for Long Black coffees or Tea.
- All stainless steel body work (AISI304) quality.
