

A premium espresso machine built for premium flavour

The Domobar Super 2B by Vibiemme Italy is a Multi Boiler espresso machine with superior thermal stability and PID control to adjust temperatures within the coffee boiler for a premium flavour with every coffee produced.

Vibiemme have introduced the new Power Management Control System (PMCS) within the Super 2B which automatically regulates power to the heating element in the brew boiler for optimal efficiency and temperature stability.

The PMCS allows the Super 2B to work in different configurations and still control the thermal stability to a minimal range of variance. As well as an increase in steam power for optimum milk texturing, speed and detailed latte art.

The multi boiler system has allowed for easy adjustments to be made to the temperature within the coffee boiler, an advantage to those who desire to create the optimal brew for a range of coffees and control the variables that come with them.

The Domobar Super 2B Technical information

- Incorporates Vibiemmes' NEW Power Management Control System (PMCS) - system automatically regulates variable power to the brew heating element allowing different configurations while maintaining optimum water volume to wattage ratio for temperature stability.
- Steam boiler ON (1200 Watt) and Coffee boiler ON (600 Watt)
- Steam boiler OFF and Coffee boiler ON (900 Watt).
- Proportional, Integral, Derivative (PID) controlled.
- 0.5 Litre coffee boiler for better temperature stability. The smaller volume of water held within this boiler means less chance of water going stale providing better flavour in the cup.
- Larger Steam boiler for high performance steaming.
- Rotary vane pump for quieter performance.
- Option available for both the drainage and the water line to be plumbed directly or draw of water reservoir.

Model	Lever 2B
Length	300mm
Depth	550mm
Height	430mm
Net Weight	28kg
Heating Element Maximum Wattage	Steam boiler - 1200 Watt Coffee Boiler - 900 Watt (600+300)
Boilers	Steam Boiler - 2 litres with a 45ml heat exchange feeding coffee boiler Coffee boiler - 0.5 litres
Voltage	240 V
Power	10 amp
Water Safety System	Yes
Country of origin	Italy
Water Supply	Water withdrawal can be sourced from both the water tank than from the water net through a simple mechanic switch, with no need to turn the machine off.
Brewing Group Head	Commercial grade E61 Group head with a weight of 4.3kg
Steam Wand	Stainless Steel, 360 degree adjustable arm
Support	Toll Free technical support 1300 326 326
