

GEH 300

The perfect solution for additional and consistent supply of hot water and steam.

To meet the ultimate demand of the Australian market for volume milk based coffee and infused teas, ECA has the GEH 300 from Plus, perfect for the instant access to consistent hot water and the ultimate additional supply for powerful dry steam on demand.

The GEH 300 is ideal for preparing hot beverages, or used to assist during times of peak supply for the preparation of textured milk for coffees. This high build quality, slimline vertical boiler unit is suitable for tight spaces around the main espresso bar preparation area.

The GEH 300 is ideal for mobile carts and markets. It should ideally be used as the primary hot water supply to ensure the cafe's continuous reliability and performance of the espresso machine without sacrificing the optimal cup quality of the espresso. It is easy-to-clean and compliant with food service standards. Available with a front fascia of stainless steel and side panels of powder coated metal, it provides a dependable output for busy service areas.

Features include:

- Volumetric rotary pump for optional connection to external water reservoir/tank.
- 13.5 litre stainless steel boiler capacity.
- Anti-vacuum valve.
- Slimline and convenient size to fit in confined spaces.
- Super-fast and hygienic.
- Steam pressure gauge for monitoring performance.

Functions:

- Able to steam continuously.
- A dispensed amount of hot water (up to 3 litres).
- Patented safety electronic water level display, which controls boiler water automatically and has unique boiler water level alert.
