

“The R60V by Rocket Espresso increases the opportunity for experimentation at home”

Rocket Espresso seeks to enhance the movement for better espresso in the home. The new R60V pressure profile 1 group machine further closes the gap between premium domestic espresso machines and the latest in commercial machine technology and developments.

Variable pump pressures enhance all coffees. Traditionally 9 bar of pump pressure has been the standard to extract oils and flavours from coffee to produce an espresso. As we learn more about coffee, from processing at the farm through to pouring an espresso, we also desire the ability to experiment and test these boundaries for ourselves.

Within each of the 5 stages of the pressure profiling system, it is possible to program

both the time intervals and the pump pressure setting in combination with each other.

The introduction of the Rocket Espresso Communication Pod allows adjustments to be made to through a remote controller or through the machine Wi-Fi system which will display real time temperatures, pressures and extraction times.

The premium domestic market is raising awareness through the ability to chase perfect espresso in the home. Machines such as the R 60V allow this market to further evolve, offering the equal of the latest commercial machine features and technologies.

R60V Features:

- Dual Boilers – Brewing 0.58 Litres and Steam 1.8 Litres.
- PID Temperature Controlled.
- Rotary pump with programmable pressure profile system.
- Rocket Espresso Communication Pod.
- 2.5 litre water reservoir or direct water connection option.
- Shot timer.

Model	Rocket R60V
Brewing Groups	1
Brew Head Style	E61 Group Head
Boiler	0.58 Litre Brew Boiler & 1.8 Litre Steam Service Boiler
Boiler Temperature Control	PID Controlled Temperature
Water Tank	2.5 litre water reservoir or ability to connect to mains water supply
Pump	Rotary pump with pressure profiling system
Coffee Control	Lever
Wattage	1400W (10 amp)
Dimensions	310 x 440 x 390 mm (width x depth x height)
Weight	29.5kg
Additional extras	Professional 58mm Rocket Branded flat base tamp, stainless steel cups surround, Full size commercial one and two cup filter handles and baskets, Instructional DVD
